### 11. Comments

#### Text Response

The answers to the electronic transcript implementation and import will actually depend on available technical assistance and a script provided by the NSC.

We want to head in the direction of sending and receiving electronic transcripts. So difficult was something we were looking at anyway.

We are already sending and receiving PDF transcripts through the National Student Clearinghouse. We tried at one time to develop XML transcript exports but we were not successful due to the number of defects in the Banner software. It will be a huge leap for us to go from receiving PDF transcripts, printing them, and processing them as we would paper to importing XML transcript data into our system.

**25. How could this session be improved?**

**Text Response**

I believe that a next session could easily be a phone conference.

Remote access availability for those who do not want to or can't travel.

I am a records person, I value to IT morning session, but most of it was over my head. I question whether it would have been better to have the 2 group meet separately.

Sessions were good: Having copies of policy proposals included in packet would have been helpful. Implementation group had to spend time explaining policy "musts" in order for people to consider the range of implementation "maybes" More planning time should be allowed for future meetings

The draft policy could have been given out ahead of time.
